

Data Activity

1. Based on the given data, what might be some of the vulnerable populations in your community (Coachella, Palm Springs, or San Bernardino)? How are they different than the two other communities?
2. For your example community, what characteristics or conditions covered would you like to see broken down by smaller geography (map), race/ethnicity, income, age, sex, etc.? Why?
3. What input would you want to hear from community members or groups? Which ones? How would you get it?
